	<i>Preface</i>	<i>viii</i>
	<b>Section 1: Background Concepts</b>	<b>1</b>
1.1	INTRODUCTION	1
1.1.1	Water quality perspective	1
1.1.2	Surface characteristics	3
1.2	COLLOIDS	5
1.2.1	General concepts	5
1.2.2	Van der Waals interaction	6
1.2.3	Electrical double layer	7
1.2.4	Double layer interaction energy	8
1.2.5	Combined interaction	9
1.2.6	Hydration and hydrophobic interactions	10
1.2.7	Steric stabilisation	11
1.2.8	Polymer bridging	12
1.2.9	Electrostatic bridging	13
1.2.10	Stability and binding	15
1.3	FLOC FORMATION	16
1.3.1	Introduction	16
1.3.2	Mechanisms of coagulation	16

1.3.3	Principles of flocculation	21
1.4	MIXING FACTORS	27
1.4.1	Introduction	27
1.4.2	Facets of turbulence	28
1.4.3	Characterisation of mixers	33
1.4.4	Mixing timescales	34
1.5	HYDROLYSING COAGULANTS	36
1.5.1	Perspective	36
1.5.2	Monomeric hydrolysis products	38
1.5.3	Polynuclear species	41
1.5.4	Time factors	47
1.5.5	Charge factors	48
1.5.6	Surface area	50
1.5.7	Water binding	50
1.6	SYNTHETIC ORGANIC POLYMERS	51
1.7	SOLIDS PRODUCTION and COMPOSITION	55
1.8	REFERENCES	57

## **Section 2: Characterisation**

**61**

2.1	PARTICLE STRUCTURES	61
2.1.1	Introduction	61
2.1.2	Fractal dimensions	61
2.1.3	Clusters	66
2.1.4	Chain formation	71
2.1.5	Bound water	71
2.2	HYDRODYNAMIC BEHAVIOUR OF SUSPENSIONS	74
2.2.1	Low Reynolds number flows	74
2.2.2	Permeability	76
2.2.3	Settlement	80
2.3	RHEOLOGY	85
2.3.1	General concepts: patterns of deformation	85
2.3.2	Viscosity: basic concepts	87
2.3.3	Gels	90
2.3.4	Fast elastic deformation	92
2.3.5	Yield stress in shear	94
2.3.6	Normal stresses	99
2.3.7	Viscosity	102
2.4	FLOC STRENGTH	104
2.4.1	Perspective	104
2.4.2	Viscous flows	105

2.4.3	Turbulent flows	110
2.4.4	Structural model	114
2.4.5	Strength-turbulence interaction	116
2.5	DISTRIBUTIONS	118
2.5.1	Overview	118
2.5.2	Representation of distributions	120
2.5.3	Distribution moments	122
2.6	REFERENCES	124

### **Section 3: Flocs in Practice** **128**

3.1	MEASUREMENT	128
3.1.1	Perspective	128
3.1.2	Size	128
3.1.3	Fractal properties	133
3.1.4	Strength	145
3.1.5	Overview	148
3.2	IMPACTS ON FLOC PROPERTIES	149
3.2.1	Perspective and scope	149
3.2.2	Coagulants	150
3.2.3	Size-density relationship	159
3.2.4	Optimised coagulation conditions	163
3.2.5	Temperature	166
3.2.6	Flocculant aids	171
3.2.7	Shear	179
3.2.8	Overview	191
3.3	IMPACTS ON TREATMENT PROCESSES	191
3.3.1	Background	191
3.3.2	Chemical application	195
3.3.3	Flocculation	197
3.3.4	Floc blanket clarifiers	201
3.3.5	Dissolved air flotation	206
3.3.6	Filtration	211
3.3.7	Dewatering	221
3.3.8	Overview	248
3.4	REFERENCES	249
