## **Preface**

<b>Chapter 1. Introduction</b>	1
Reference	6
<b>Chapter 2. Food and waste characteristics</b>	7
2.1 Life cycle of pig	7
2.2 Food for pigs (Diet for pigs)	9
2.3 Waste discharge from pig farms (pig houses)	12
Reference	20
<b>Chapter 3. Solid separation and overall management system</b>	23
3.1 Treatment of animal waste	25
3.2 Settling and digestion	25
3.3 Mechanical separators	25
3.4 Anaerobic baffled reactor (ABR)	25
Reference	29
<b>Chapter 4. Recycling technology – composting, struvite,     Liquid fertilizer</b>	31
4.1 Introduction	31
4.2 Stabilization technologies applied to piggery waste for animal agriculture	34
4.2.1 Factors to be considered for land application	35
4.3 Composting	43
4.3.1 Retention time	47
4.3.2 Aeration requirement	47
4.3.3 Applicable standards	48
4.4 Anaerobic treatment	50
4.4.1 Fundamentals of anaerobic treatment	50
4.4.2 Bioliquid from anaerobic storage	51
4.4.3 Lagoons	52
4.4.4 Covered and heated anaerobic digestion	53

4.5 Thermophilic aerobic digestion	54
4.5.1 COD and nitrogen removal efficiencies	54
4.5.2 Small installations	58
4.5.3 Expected reactor temperature	59
4.6 Duckweed and fish ponds	62
4.7 Struvite	65
4.7.1 Reaction time and pH	66
4.7.2 Molar ratio	67
4.7.3 Seeding	68
4.7.4 Composition of precipitates	69
4.8 Direct urine reuse	69
Reference	70
<b>Chapter 5. Nutrient removal</b>	<b>75</b>
5.1 Introduction	75
5.2 Nitrogen removal processes	76
5.2.1 Nitrification	76
5.2.2 Denitrification	85
5.2.3 N <sub>2</sub> O emission	94
5.2.4 Nitrification and denitrification model	95
5.3 Kinetic model proposed for nitrogen removal from piggery wastewater	96
5.4 ANAMMOX process	99
5.5 Phosphorus removal in BNR system	102
Reference	105
<b>Chapter 6. Post treatment</b>	<b>107</b>
6.1 Introduction	107
6.2 Chemical coagulation	110
6.3 Advanced oxidation processes	111
6.3.1 Basic mechanism	112
6.3.2 Degree of chemical oxidation	115
6.3.3 Stoichiometry of chemical oxidation	115
6.4 Application of advanced oxidation processes	116
6.4.1 Fenton process (Fe <sup>2+</sup> /H <sub>2</sub> O <sub>2</sub> )	118
6.4.2 Ozonation	119
6.4.3 UV radiation	120

6.4.4 Electrochemical destruction	120
6.4.5 Oxidation of strong liquid	120
6.5 Adsorption	121
6.6 Membrane bio reactor (MBR)	122
6.6.1 Application of membrane for piggery and kitchen waste treatment plant	125
6.6.2 Piggery wastewater treatment plant in CW plant in Korea	126
6.6.3 VSEP RO (vibrating shear extraction process reverse osmosis)	128
Reference	130
<b>Chapter 7. Integrated systems</b>	<b>133</b>
7.1 Introduction	133
7.2 Manure based biogas plants (MBBP)	134
7.3 Environmentally superior technologies (EST)	139
7.3.1 Aerobic blanket system (ABS) technology	140
7.3.2 Permeable cover system (PCS) technology	141
7.3.3 Recycling of existing nutrient, energy and water (RENEW)	142
7.3.4 High solid anaerobic digestion (HSAD)	143
7.3.5 Biological aerated filter (BAF) syste	144
7.3.6 BEST biofuel system	145
7.4 Korean practices with limited land	148
7.4.1 Waste recycle systems for animal / agriculture uses	149
7.4.2 Wastewater characteristics	150
7.4.3 Wastewater treatment systems	151
7.4.4 Evaluation of three full scale plants	152
7.4.5 PJ plant	156
7.4.6 Integrated Biogas Energy System (IBES)	158
7.4.7 Pig apartment	159
7.4.8 Pig house simulated to nature	161
7.5 Tropical experiences	162
7.5.1 Singapore experience	162
7.5.2 Malaysian experience	166
Reference	166
