

Integrated Transboundary Water Management in Theory and Practice

This book will examine and analyse the problems inherent in integrated water management in transboundary conditions.

Integrated Transboundary Water Management in Theory and Practice will provide new knowledge and policy recommendations based on the experiences and results of a major 3-year interdisciplinary research project (MANTRA-East).

Drawing on extensive studies of the Lake Peipsi region in Estonia and Russia, the book explores the political and social issues surrounding transboundary water management and introduces the way that qualitative-quantitative-qualitative scenarios have been used in real-life situations.

The book presents conclusions and policy recommendations for integrated transboundary water management that will be invaluable to water managers, policy-makers and academic researchers working in this rapidly expanding field.
