

# Aeration, Mixing, and Energy: Bubbles and Sparks

**Editor(s):** Diego Rosso

*Aeration, Mixing, and Energy: Bubbles and Sparks* is the first book on bubbles and sparks, presenting the state-of-the-art on aeration and mixing technology for water and wastewater treatment systems.

Aeration and mixing are the heart of wastewater treatment and must be performed well and at high efficiency for successful treatment. After reviewing the most current aeration systems, this book presents the best ways of measuring aeration system performance and to use those measurements for design, control, and sustainable operations. A team of experts in the field were assembled to help write this book, which is the product of several years of work and decades of combined experience.

*Aeration, Mixing, and Energy: Bubbles and Sparks* is a valuable complement to any book on water reclamation and wastewater treatment.
