

Cutting-edge Technology and Systems for Water Treatment and Reuse

Editor(s): Peng-Kang Jin, Ying-Xue Sun, Can Wang, Huang Huang and Yin-Hu Wu

Water treatment and reuse is the key strategy to address the problems of water shortages. This book deals with various problems and investigates different treatment technologies concerning water reuse. In response to the challenges of severe water shortages and the deterioration of water quality, the focus on cutting-edge technology and systems for water treatment and reuse is fast-growing worldwide. Progress is needed to provide high quality reclaimed water, minimize the risks to environment and human health, and support use of non-conventional water resources.

In Focus – a book series that showcases the latest accomplishments in water research. Each book focuses on a specialist area with papers from top experts in the field. It aims to be a vehicle for in-depth understanding and inspire further conversations in the sector.
